An International Journal for Chemical Biology in Health and Disease

CONTENTS VOLUME 255, Nos. 1 & 2, January (I) 2004

MOLECULAR MECHANISMS OF METAL TOXICITY AND CARCINOGENESIS

Drs. X. Shi, V. Castranova, V. Vallyathan and B. Sonawane

X. Shi, V. Castranova, V. Vallyathan and B. Sonawane: Preface

1

Conference overview

S.S. Leonard, J.J. Bower and X. Shi: Metal-induced toxicity, carcinogenesis, mechanisms and cellular responses 3-10

Y. Xie, J. Liu, Y. Liu, C.D. Klaassen and M.P. Waalkes: Toxicokinetic and genomic analysis of chronic arsenic exposure in multidrug-resistance *mdr1a/1b*(-/-) double knockout mice 11-18

H.D. Skinner, X.-s. Zhong, N. Gao, X. Shi and B.-H. Jiang: Arsenite induces p70S6K1 activation and HIF-1 α expression in prostate cancer cells 19-23

A.M. Salazar, E. Calderón-Aranda, M.E. Cebrián, M. Sordo, A. Bendesky, A. Gómez-Muñoz, L. Acosta-Saavedra and P. Ostrosky-Wegman: p53 Expression in circulating lymphocytes of non-melanoma skin cancer patients from an arsenic contaminated region in Mexico. A pilot study 25-31

N. Gao, L. Shen, Z. Zhang, S.S. Leonard, H. He, X.-G. Zhang, X. Shi and B.-H. Jiang: Arsenite induces HIF-1 α and VEGF through PI3K, Akt and reactive oxygen species in DU145 human prostate carcinoma cells 33-45

P.B. Tchounwou, J.A. Centeno and A.K. Patlolla: Arsenic toxicity, mutagenesis, and carcinogenesis - a health risk assessment and management approach 47-55

C. Huang, Q. Ke, M. Costa and X. Shi: Molecular mechanisms of arsenic carcinogenesis 57-66

H. Shi, X. Shi and K.J. Liu: Oxidative mechanism of arsenic toxicity and carcinogenesis 67-78

P. Li, A.N. Uddin, Z. Liu, R. Mukhopadhyay, E.V. Komissaroval, B.P. Rosen and T.G. Rossman: Variability in sensitivity to arsenite does not correlate with arsenic accumulation rate in normal human lymphoblasts 79-85

M. Nishijo, S. Satarug, R. Honda, I. Tsuritani and K. Aoshima: The gender differences in health effects of environmental cadmium exposure and potential mechanisms 87-92

P. Joseph, Y.-X. Lei and T.-m. Ong: Up-regulation of expression of translation factors - a novel molecular mechanism for cadmium carcinogenesis 93-101

S.S. Wise, L.W. Elmore, S.E. Holt, J.E. Little, P.G. Antonucci, B.H. Bryant and J.P. Wise Sr: Telomerase-mediated lifespan extension of human bronchial cells does not affect hexavalent chromium-induced cytotoxicity or genotoxicity 103-111

C.M. Ramsey and N.S. Dalal: Crystalline and water soluble Cr(4+) and Cr(5+) model compounds for chromium toxicity studies 113-118

S. Wang, S.S. Leonard, J. Ye, N. Gao, L. Wang and X. Shi: Role of reactive oxygen species and Cr(VI) in Ras-mediated signal transduction 119-127

S. Wang, F. Chen, Z. Zhang, B.-h. Jiang, L. Jia and X. Shi: NF- κ B prevents cells from undergoing Cr(VI)-induced apoptosis 129-137

S. Ceryak, C. Zingariello, T. O'Brien and S.R. Patierno: Induction of pro-apoptotic and cell cycle-inhibiting genes in chromium (VI)-treated human lung fibroblasts: Lack of effect of ERK 139-149

J. Xu, F.C.R. Manning, T.J. O'Brien, S. Ceryak and S.R. Patierno: Mechanisms of chromium-induced suppression of RNA synthesis in cellular and cell-free systems: Relationship to RNA polymerase arrest 151-160

P.B. Tchounwou, C.G. Yedjou, D.N. Foxx, A.B. Ishaque and E. Shen: Lead-induced cytotoxicity and transcriptional activation of stress genes in human liver carcinoma (HepG₂) cells 161-170

S.S. Leonard, J.R. Roberts, J.M. Antonini, V. Castranova and X. Shi: PbCrO₄ mediates cellular responses via reactive oxygen species 171-179

A. Chiu, A.J. Katz, J. Beaubier, N. Chiu and X. Shi: Genetic and cellular mechanisms in chromium and nickel carcinogenesis considering epidemiologic findings 181-194

R. Kowara, K. Salnikow, B.A. Diwan, R.M. Bare, M.P. Waalkes and K.S. Kasprzak: Reduced Fhit protein expression in nickel-transformed mouse cells and in nickel-induced murine sarcomas 195-202

R. Verma, J. Ramnath, F. Clemens, L.C. Kaspian and J.R. Landolph: Molecular biology of nickel carcinogenesis: Identification of differentially expressed genes in morphologically transformed C3H10T1/2 Cl 8 mouse embryo fibroblast cell lines induced by specific insoluble nickel compounds 203-216

J. Li, S. Dokka, L. Wang, X. Shi, V. Castranova, Y. Yan, M. Costa and C. Huang: Activation of aPKC is required for vanadate-induced phosphorylation of protein kinase B (Akt), but not p70^{S6k} in mouse epidermal JB6 cells 217-225

Z. Zhang, N. Gao, H. He, C. Huang, J. Luo and X. Shi: Vanadate activated Akt and promoted S phase entry 227-237

Z. Zhang, N. Gao, H. He, C. Huang, B.-h. Jiang, L. Jia and X. Shi: The role of phosphatidylinositol-3 kinase in vanadate-promoted S phase entry 239-245

A.C. Miller, K. Brooks, J. Smith and N. Page: Effect of the militarily-relevant heavy metals, depleted uranium and heavy metal tungsten-alloy on gene expression in human liver carcinoma cells (HepG2) 247-256

J.M. Antonini, M.D. Taylor, S.S. Leonard, N.J. Lawryk, X. Shi, R.W. Clarke and J.R. Roberts: Metal composition and solubility determine lung toxicity induced by residual oil fly ash collected from different sites within a power plant 257-265
